# INOGEN ONE®

*Why am I smiling?*

## Because I'm the only oxygen system you'll ever need.

The INOGEN ONE® is the first oxygen system designed to provide unparalleled freedom for the active oxygen user. It's approved for stationary, portable, and travel use, for daytime and nighttime, and it's a concentrator, so it never has to be refilled.

No more worries about running out of oxygen ever again. No more relying on others for your oxygen supply. And no more deliveries.

I'm smaller than your coffee maker.

The INOGEN ONE fits virtually anywhere —it can sit discreetly at your feet, behind a chair, or next to the bed, and it's light enough to carry over your shoulder. All of your oxygen needs can be met with this one small device - day or night, home or away. And it's not only small and light, it's easy to operate too. Just a couple of buttons. That's it. Once you try it, you'll wonder why anyone would use something else. Embrace the simplicity of the INOGEN ONE and see how it can make your life easier.

Head home when you *want* to, not when your oxygen tank gauge says you *have* to. Restoring your freedom is definitely a big part of what makes the INOGEN ONE so special. So go ahead, jump in the car to run errands or take a weekend trip to see your family, or take that long trip you never thought you'd be able to take. Most airlines now allow you to use the INOGEN ONE when you fly, making it easier than ever to reclaim your independence. Visit [www.inogenone.com/Travel](http://www.inogenone.com/Travel) to learn more.

I can go wherever you want.

Accessories included with your INOGEN ONE:

-  **Universal Power Supply**  
When plugged into AC or DC power, the INOGEN ONE delivers an unlimited supply of oxygen.
-  **Lithium Ion Battery**  
Each battery lasts for up to three hours. When it's plugged in (either AC or DC), the battery automatically recharges.
-  **Cart & Carry Bag**  
Designed specifically for the INOGEN ONE, take advantage of your new independence and mobility.
-  **Nasal Cannula**  
A single lumen seven foot cannula
